

INTEGRATED FACILITIES MANAGEMENT

servest

Our sole purpose is to look after your buildings, people, and assets. We are a facilities management (FM) company that will take care of your cleaning, security, landscaping, maintenance, hygiene, parking, and catering needs, to name a few. This means that you can focus on delivering on your core business activities, while we take care of the rest.

IT'S ALL ABOUT WHAT WE CAN DO FOR YOUR BUSINESS

People, technology, and innovation are the core of our business, and we combine these in a unique way to meet each individual client's needs.

There is no one size fits all solution, so you can rest assured that we will take the time to understand your business, and offer the highest quality solutions that fit your budget. At the end of the day, integrated facilities management is all about the people we serve and the partnerships we form. Our ability to connect with, engage, and inspire others, is what makes the most difference in what we do.

TECHNOLOGY, SYSTEMS AND PROCESSES

The secret to good partnerships lie in communication, and in today's knowledge era we understand the importance of having information readily available.

We have developed our very own Computer Aided Facilities Management System (CAFM), allowing us to send real time reporting and information. It's just another way we ensure we're always available to you.

At the core of effective contract management and enhanced performance expectations is the ability integrate systems, technology, IT and process in a way that demonstrates our performance levels against pre-determined performance targets. We manage all aspects of our operations including Service Level Agreements, compliance, asset management, preventative maintenance scheduling, call and incident logging, task and resource allocation and cost management through our world-class integrated technology and IT systems.

Together with our customisable reporting functionalities via our IT platform and client log in portal, our system produces customised relevant reports containing agreed analytics allowing you to make informed decisions about the management of your asset.

FM @ WORK

We aim to work closely with you to create a maintenance solution that optimally fits your business.

FM@Work provides businesses the flexibility for the provision of preventative maintenance and engineering services, ad-hoc repair and general maintenance solutions as well as professional services, tenant fit outs, moves churns and project management. Our fm@work strategy offers solution-driven maintenance services through our 24 hour helpdesk and provides peace of mind where world-class services are delivered by our team of expert engineers through planned and prioritised mobile maintenance teams servicing an area or cluster of facilities.

ENERGY SOLUTIONS

Energy saving isn't just right for businesses, it's essential for the environment. Our modern, tech-based solutions provide innovative tools and skilled professionals to help you achieve your energy consumption and compliance goals, while reducing costs and minimising your business' environmental impact.
